John A. Tomasino, Clerk of the Sovereign State of Florida. Supreme Court
Office of Clerk
500 South Duval Street
Tallahassee, Florida 32399-1927

RE: SC-17-710

Dear Mr. Tomasino

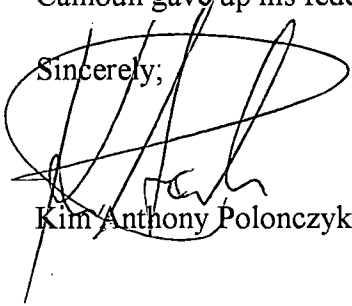

The Defendant Conspiracy in this matter has received the protection from the Federal Courts to continue to break State of Florida Statues and aggressively attack the Appellant-Petitioner. This action is of national concern let alone the State of Florida being Sovereign and able to protect its own sovereignty and peoples.

Please before you make the mistake of brushing this matter off at least review the Action and all material on this disc and set this Action before the Sovereign Florida State Supreme Court and have this Action adjudicated. The Sovereignty of a "State" to enact and enforce Statues is in question here.

The U.S. District Court Judge and Magistrate have actually filed a lawsuit against the Appellant Petitioner to protect the Defendant Conspiracy "RICO Organization" because they are a Corporation. Is this not more than just giving legal advise? If I vote on something does that really become a law? Has every Statue that the state of Florida sent people to prison or put them to death in question here?

The protection of the Sovereignty of the State is so important that Vice President John C. Calhoun gave up his federal office to return to his home state to fight for the Sovereignty of that state.

Sincerely,

Kim Anthony Polonczyk.
